

# Revolutionary new diet pill with fiber, vitamins, and appetite suppressant gets fast results!

*The Fill Pill hits the market with rave reviews and fast results. No Caffeine, No Stimulants.*

The Fill Pill<sup>®</sup> is an advanced formula that both suppresses hunger and aides in cleansing the digestive tract. The Fill Pill<sup>®</sup> contains a special 0 carb/calorie soluble fiber that expands to 50-plus times its size when mixed with liquid and aides in normalizing blood sugar levels by cleansing the digestive tract of toxins and fats. One double-blind study showed that individuals taking this fiber consistently lost weight over a 3 month period compared to those who didn't.

In addition to the amazing expanding and cleansing properties, The Fill Pill<sup>®</sup> also contains an all natural, safe, non-stimulant appetite suppressant, which has been used in India for centuries. One double-blind study showed that those taking this appetite suppressant felt fuller before meals than those who didn't, and, as a result, ate less and lost weight.

In creating The Fill Pill<sup>®</sup>, we recognized that the body and mind need certain nutrients to feel full and function properly. The body needs vitamins and minerals to be at its best, so we added just the right amount to ensure you get what you need. This includes calcium, which helps prevent osteoporosis, and vitamins. If you take 3 servings of 4 pills per day, you will get a full day's vitamins.

When you take 4 of The Fill Pill<sup>®</sup> with 16 oz of water your body is getting dietary fiber from glucomannan, glycosides from caralluma, along with vitamins and calcium. The combination of the expanding properties of the glucomannan in water along with the glycosides, vitamins and calcium fool your body into feeling full. Since your body requires calories for daily activity and The Fill Pill<sup>®</sup> has none it will look to your fat reserves to get the calories it needs to function. This will cause a rapid loss of fat and in turn weight loss.
